Description

methods_ryxlib

`read_xyData` *Import xy-Data for Supported Formats into R*

Description

The function provides access to the underlying `xylib` to import data for supported file formats into R. In most cases, only the file path is needed with further arguments to import the data. The function automatically recognises allowed formats. See rxylib-package for supported formats.

Usage

```
read_xyData(file, options = "", verbose = TRUE, metaData = TRUE)
```

Arguments

`file`	character (**required**): path and file to be imported. The argument accepts an `URL`.
`options`	character (with default): set format options (see rxylib-package)
`verbose`	logical (*with default*): enables/disables verbose mode
`metaData`	logical (*with default*): enables/disbales the export of metadata

Value

The functions returns a list of matrices.

Function version

0.2.0

Examples

```
##load example dataset
file <- system.file("extdata/ExampleSpectrum.CNF", package = "rxylib")
results <- read_xyData(file)
results

##plot spectrum
plot(results$dataset[[1]]$data_block,
 type = "l",
 log = "y",
 xlab = "Energy [keV]",
 ylab = "Counts",
 main = "Thorite - 1800 s")

mtext(side = 3, "Canberra Inspector 1000, 3 x 3 NaI probe")
```
