

Package ‘rxylib’

July 6, 2017

Type Package

Title Import XY-Data into R

Description Provides access to the 'xylib' C library for to import xy data from powder diffraction, spectroscopy and other experimental methods.

Version 0.1.1

Date 2017-07-05

Author Sebastian Kreutzer [aut, trl, cre],
Johannes Friedrich [ctb],
RLum Team [ctb],
Marcin Wojdyr [cph] (C++ library 'xylib'),
Peng Zhang [cph] (C++ library 'xylib')

rxylib-package

*Import XY-Data into R***Description**

Provides access to the 'xylib' C library for to import xy data from powder diffraction, spectroscopy and other experimental methods, like gamma-ray spectrometry.

Package: rxylib
 Type: Package
 Version: 0.1.1
 Date: 2017-07-05
 License: GPL-3 | LGPL-2.1 (for the C++ library 'xylib')

Details

Currently the package uses 'xylib' in version 1.6 (unreleased).

Supported data formats

ID	NAME	DESCRIPTION	FILE EXTENSION	VALID_OPTIONS	DATATYPE	BLO
[1,]	cpi	Sietronics Sieray CPI	cpi		ascii	single
[2,]	uxd	Bruker Diffrac-AT UXD	uxd		ascii	multi
[3,]	rigaku_dat	Rigaku DAT	dat		ascii	multi
[4,]	bruker_raw	Siemens/Bruker RAW	raw		binary	multi

Author(s)

Sebastian Kreutzer, IRAMAT-CRP2A, Universite Bordeaux Montaigne (France), Johannes Friedrich (University of Bayreuth, Germany; bug fix contributions), RLum Team (family support), Marcin Wojdyr (maintainer and author of the C++ library 'xylib'), Peng Zhang (author of the C++ library 'xylib')

read_xyData*Import xy-Data for Supported Formats into R*

Description

The function provides access to the underlying `xylib` to import data for supported file formats into R. In most cases, only the file path is needed with further arguments to import the data. The function automatically recognises allowed formats. See [rxylib-package](#) for supported formats.

Usage

```
read_xyData(file, options = "", verbose = TRUE)
```

Arguments

file	character (required): path and file to be imported. The argument accepts an URL.
options	character (with default): set format options (see rxylib-package)
verbose	logical (<i>with default</i>): enables/disables verbose mode

Value

The functions returns a [list](#) of matrices.

Function version

0.1.0

Author(s)

Sebastian Kreutzer, IRAMAT-CRP2A, Universite Bordeaux Montaigne (France)

Examples

```
##load example dataset
file <- system.file("extdata/ExampleSpectrum.CNF", package = "rxylib")
results <- read_xyData(file)

##plot spectrum
plot(results[[1]],
      type = "l",
      log = "y",
      xlab = "Energy [keV]",
      ylab = "Counts",
      main = "Thorite - 1800 s")

mtext(side = 3, "Canberra Inspector 1000, 3 x 3 NaI probe")
```
