convert_xy2TKA	<i>Convert xy-data to TKA</i>
----------------	-------------------------------

---

Description

Convert data to the Toolkit file format (TKA) as exported by, e.g., by the software Canberra Genie 2000.

Usage

```
convert_xy2TKA(object, file = NULL, overwrite = FALSE)
```

Arguments

object	<b>rxylib (required)</b> : xy data as imported by the function <a href="#">read_xyData</a> . Optional a file supported by the rxylib-package can be provided as input. Arguments can be provided as <a href="#">list</a> .
file	<b>character</b> (optional): optional file path or file name for the output to be written. If only a path is provided the output file name is derived from the input file name. Argument can be provided as <a href="#">list</a> .
overwrite	<b>logical</b> (with default): force overwriting of existing files if TRUE.

Details

Supported formats

- Canberra CNF
- further formats on request ...

Value

Returns a [list](#) of [matrix](#) objects or an output TKA-file.

Function version

0.1.1

**Examples**

```
##convert CNF data (no export to file system)
convert_xy2TKA(
  object = system.file("extdata/ExampleSpectrum.CNF", package = "rxylib"))

## Not run:
##export as file

##create temporary filepath
##(for usage replace by own path)
temp_file <- tempfile(pattern = "output", fileext = ".TKA")

##convert and write to file system
convert_xy2TKA(
  object = system.file("extdata/ExampleSpectrum.CNF", package = "rxylib"),
  file = temp_file)

## End(Not run)
```

methods\_rxylib

*methods\_rxylib*

---

**Description**

S3-methods support by the package rxylib. Listed functions can be passed directly into S3 generics (e.g., [plot](#), [print](#)) without reshaping the data.

**Usage**

```
## S3 method for class 'rxylib'
print(x, ...)

## S3 method for class 'rxylib'
plot(x, block = NULL, ...)
```

**Arguments**

x	( <b>required</b> ): input object
...	further arguments that can be passed to the method
block	<a href="#">numeric</a> (with default): select block for plotting, e.g. c(1:2).

---

read\_xyData*Import xy-Data for Supported Formats into R*

---

## Description

The function provides access to the underlying xylib to import data for supported file formats into R. In most cases, only the file path is needed with further arguments to import the data. The function automatically recognises allowed formats. See [rxylib-package](#) for supported formats.

## Usage

```
read_xyData(file, options = "", verbose = TRUE, metaData = TRUE)
```

## Arguments

file	<a href="#">character</a> ( <b>required</b> ): path and file to be imported. The argument accepts an URL.
options	<a href="#">character</a> (with default): set format options (see <a href="#">rxylib-package</a> )
verbose	<a href="#">logical</a> ( <i>with default</i> ): enables/disables verbose mode
metaData	<a href="#">logical</a> ( <i>with default</i> ): enables/disables the export of metadata

## Value

The functions returns a [list](#) of matrices.

## Function version

0.3.0

```

```
